## University Projects

---

- Master Blaster is a fun, quiz game inspired from Candy Crush. The game has been developed in C++ using SFML graphics and gaming library. The main motive of this project was to strengthen the core concepts of Object oriented programming and Data Structures that we learned during our coursework at university. Master Blaster received a recognition at project exhibition held at UET Peshawar. [Github](#)  
(Master Blaster was a collective effort done along with two other amazing project mates, Mohsin Khan and Ozair Sultan,, who contributed towards UI/UX and Development at various phases.
- Vena Drops of Life is a digital centralized blood donations platform which aims to facilitate the process of arranging blood donor in case emergency and dire needs. In order to provide maximum facility the platform is provided in the form of a Web Application, Android Mobile App, iOS Application and Text Messaging. A user

can register themselves or request blood through any of digital platform or if they have no internet they can simply send a text message of 8583 (Pakistan only) and the system will open their blood request.

## Notable Freelance Projects

---

- **Aasan Karobar (Prime Minister's Aasan Karobar Initiative)** - Working on product development of PM Aasan Karobar initiative as a freelancer under i cube ( I^3) technologies. The product is ready to be launched and revealed on 31st March 2022, at Jinnah Convention by none other than the Prime Minister and IT Ministry itself.
- **Postidal** - Postidal Inc. is an ecommerce platform based in the United States, dedicated to sell high quality appliances to customer all across the globe. The client reached me out via Fiverr to develop an Android and iOS application for his already existing e-commerce web store. We did a thorough study of their website and recommended them to convert their existing website into an application using WebView. We modified the website and developed the app with such accuracy that users on mobile phones cannot even tell the difference when interacting with the application. seeing is believing. [Android App](#), [iOS App](#), [website](#).

## Volunteer Work

---

**Co-Founder/Chairman**

**Uraan Changing Perspectives**  
**Sep 2018–Nov 2020**

Peshawar, Pakistan

Uraan Changing Perspectives is a platform that has been founded to uplift the underprivileged sectors of society, Uraan Changing Perspectives support the poor faction with zero to none facilities in terms of financial support, coaching classes, personality development and career counseling. During my tenure I have been actively involved in devising and setting the policy for organization on large and small scale.

## Interests

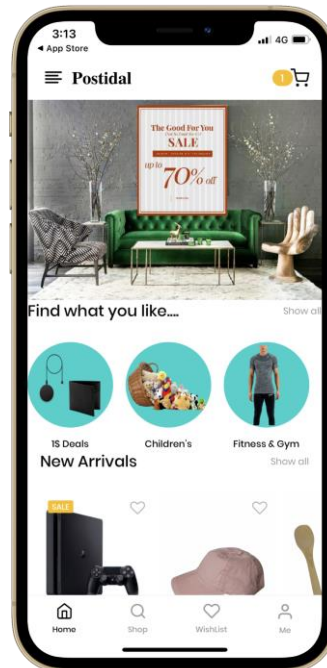

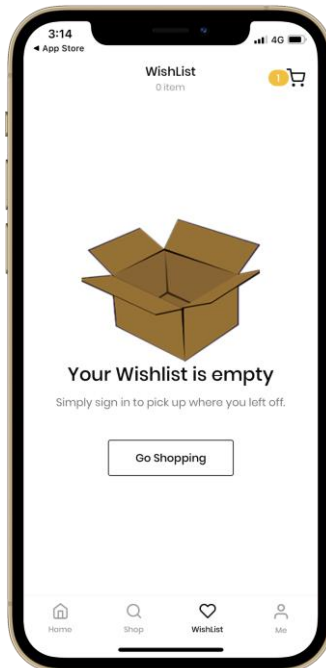

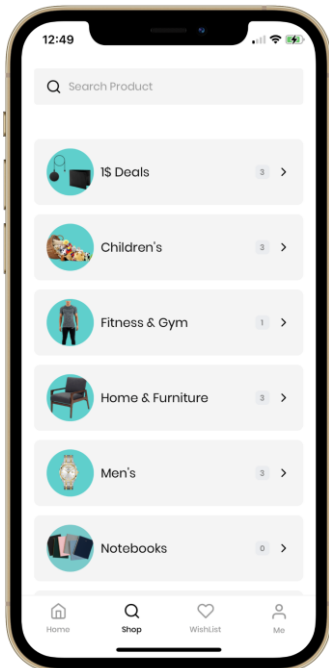

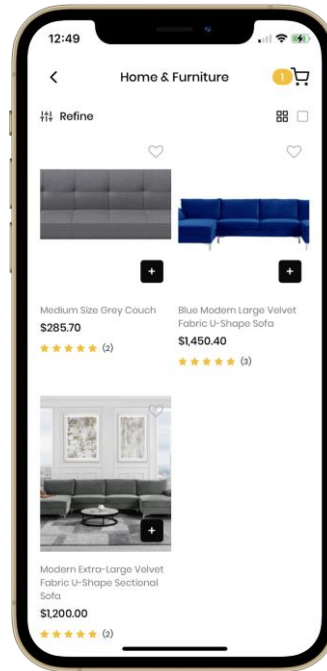

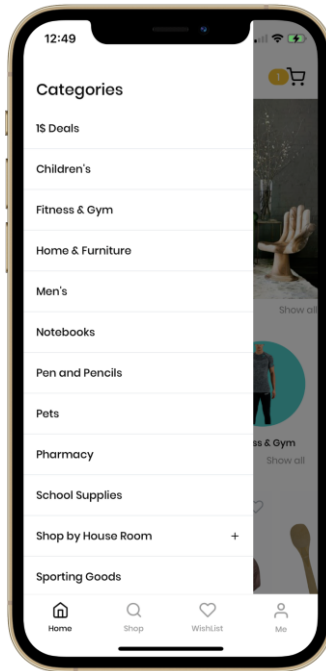

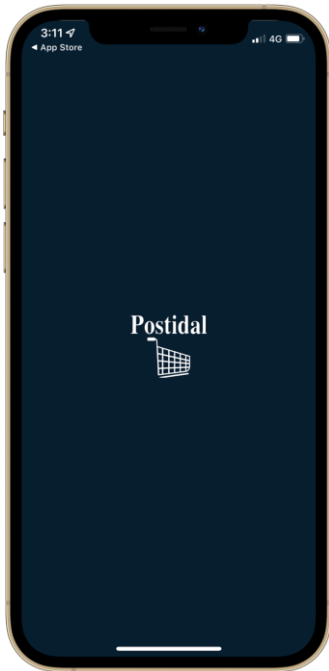

---

- Book Reading (philosophy, religion, theoretical physics, history, ancient civilizations and mythology)
  - Coding - I am an avid programmer who even dreams in code, most of my time is spent in front of laptop coding professional or my own learning projects.
  - Driving - After a hectic day on work I like to take off all the heat by going on a long night drive and taking a cup of coffee at food street nearby.
  - Green Energy - A greater part of my time is spent studying green energy techniques and I have my own idea drafted 50-60% for greenest electric car possible.
-
